

RIYA PATEL

Senior Product Designer

Portfolio: <https://riyadesigns.com/>

Email: designer.riyash@gmail.com

Linkedin: <www.linkedin.com/in/designerriya/>

Specializing in B2B and B2C SaaS, fintech, AI, CRM, e-commerce, enterprise, Data & Analytics, and Developer Tools. Experienced in leading end-to-end product design, UX strategy, and driving measurable product impact.

EXPERIENCE

Sr. Product Designer | Aarav Solutions | Mississauga, Ontario

March 2024 – Present

I lead end-to-end product design across AI-powered products, SaaS platforms, and Data & Analytics experiences, owning the end-to-end design process from discovery through launch. My work spans complex web and mobile (iOS & Android) workflows, design systems, accessibility, and product strategy, partnering closely with PM, stakeholders, engineering, and business teams to ship scalable experiences.

- Led **0→1** product strategy and design for AI-powered SaaS experiences, transforming complex healthcare workflows into scalable web and mobile solutions that drove a **30%** increase in adoption, saved **600+** minutes daily, and supported **5+** healthcare specialties.
- Transformed complex data and analytics workflows by restructuring information architecture and simplifying data exploration, driving a 25% increase in user engagement.
- Evolved design systems and component libraries to improve consistency and reduce design debt.
- Optimized key user journeys by identifying and addressing critical friction points, reducing customer churn by **20%** and strengthening product retention.

Product Designer | Odoo | Gandhinagar, India

June 2022 – January 2024

Designed B2B SaaS and ERP products across CRM, e-commerce, and business management workflows, applying product thinking to balance user needs, business goals, and technical constraints. Led problems from discovery through execution using research, user flows, wireframes, prototyping, and interaction design. Reimagined the third-party integration experience by identifying workflow friction and designing scalable patterns across the Odoo ecosystem, cutting integration setup time by **20%** and improving developer time-to-value.

- Streamlined the design-to-development process by establishing clearer design standards and strengthening cross-functional collaboration, resulting in a **25%** reduction in handoff and development time.
- Created reusable UI patterns and components to improve consistency across product experiences.
- Conducted usability testing and iterated on designs based on user feedback and product requirements.

UX Designer | Rao Information Technology | Ahmedabad, India

March 2021 – March 2022

Worked on UX strategy and digital product experiences, using user research, competitive analysis, and user flows to identify opportunities and shape intuitive solutions. Collaborated with product and development teams to translate research insights into wireframes, prototypes, and UI designs, ensuring experiences aligned with user needs and business goals.

- Shaped product improvements through user research and competitive analysis, uncovering critical usability gaps and translating insights into targeted UX changes that increased user satisfaction by **20%**.
- Translated UX strategies into responsive UI designs and cohesive visual experiences.
- Designed and validated end-to-end user flows through wireframing and interactive prototyping, uncovering UX friction and reducing task completion time by **30%** while improving key user journeys.
- Partnered with developers to maintain design quality and consistency through implementation.

SELECTED CASE STUDIES

Therapix — AI-Powered Clinical Documentation & Web Application:

Problem: Clinical documentation was time-consuming and pulled clinicians away from patient care. | **What I Did:** Designed the 0→1 AI-powered web application for recording, AI-generated **2K+ SOAP notes**, review and editing, forms, and EMR workflows, giving clinicians greater control over the documentation process. | **Outcome:** Reduced manual documentation effort by **40%**, increased clinician workflow completion by **30%**, and improved usability scores by **25%** across key documentation journeys.

Zapp Wallet — FinTech Mobile Wallet Experience:

Problem: Everyday financial tasks like sending money, checking balances, and tracking spending were complex and created uncertainty for users. | **What I Did:** Designed a user-centered mobile wallet experience that simplified payments, transfers, QR transactions, wallet management, financial insights, and security workflows. | **Outcome:** Made transactions **35%** faster, increased engagement by **20%**, and improved financial visibility and user confidence through clearer workflows and trust-focused design.

Akshar Packs — B2B E-commerce Platform:

Problem: Complex product discovery and inquiry workflows created friction for customers. | **What I Did:** Redesigned product discovery, product details, and lead-generation flows for a scalable B2B experience. | **Outcome:** Increased engagement by **30%** and improved lead generation through clearer, conversion-focused UX.

SKILLS

Product Design: End-to-End Product Design, Product Thinking, UX Strategy, Problem framing, discovery, ideation

UX & Research: User Research, usability Testing, Journey Mapping, User Flows, Information Architecture, Heuristic Evaluation, A/B Testing

Design Execution: Wireframes, Interactive Prototypes, High-Fidelity Mockups, Responsive Web & Mobile Design, Design System, Accessibility

Tools: Figma, Adobe XD, Sketch, Adobe Creative Suite, Framer, Jira, Miro, Mural, Confluence

EDUCATION

Master of Design (Interaction Design) – National Institute of Design, Ahmedabad, India

2020–2022

Bachelor of Design (UI/UX) – Silver Oak Institute of Design, Ahmedabad, India

2016–2020
